

KEEP IT CLASSIC

HANDMADE IN EUROPE

LAMBDA GOLF is a response to uncompromising classic golf footwear. The follow-up result of a European group of family-owned companies that range from footwear manufacturing to health services, with more than 40 years of manufacturing experience, expertise and know-how in the footwear industry.

LAMBDA GOLF handmakes all its golf footwear in Portugal, managing the entire production process, ensuring the highest quality with environment friendly materials sourced in Europe.

LAMBDA's innovative patented technologies result in a handmade in Portugal classic golf shoe construction and design, providing golfers with a solid stand, allowing the foot to breathe, while remaining comfortable, flexible and lightweight.

TECHNOLOGY

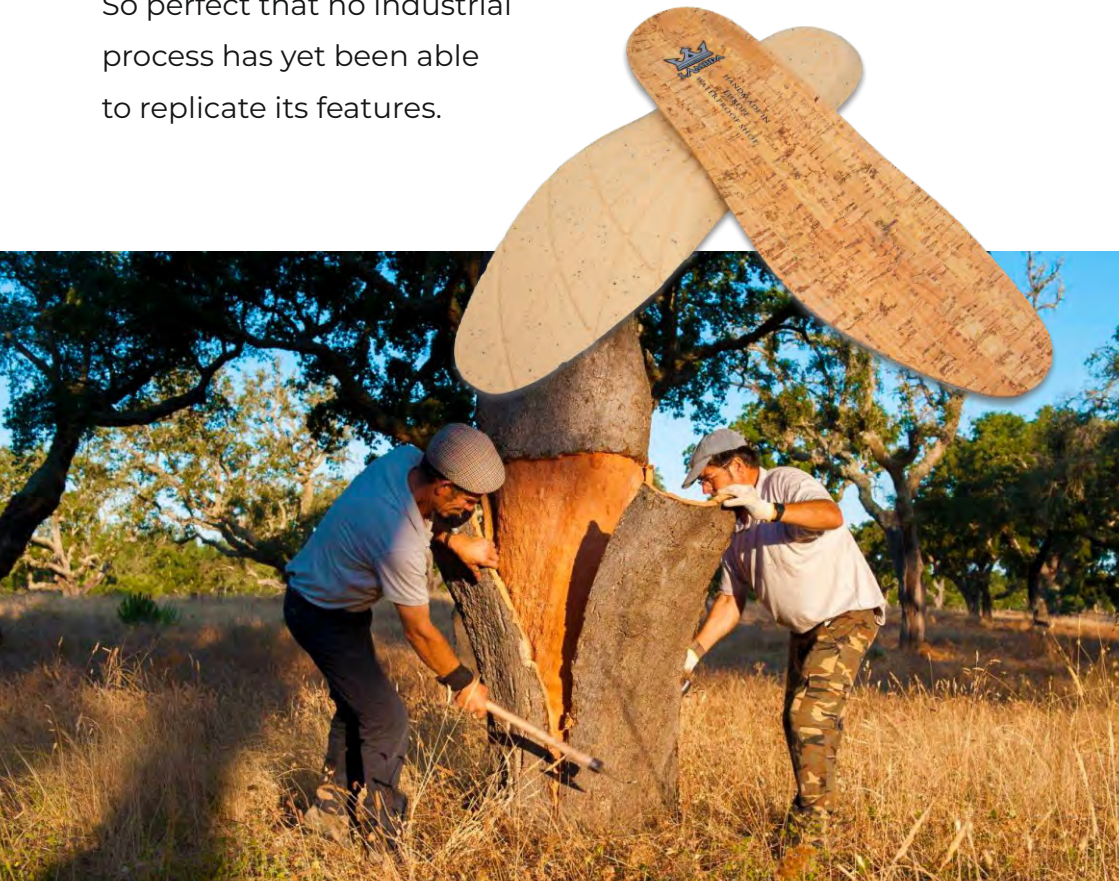

FOOTBED AND WATERPROOF MEMBRANE

LAMBDA's

Premium Cork Footbed

Nature beneath your every step. Cork is the bark from the cork oak tree, manually harvested in Portugal, Western Europe, once every 9 years, without damaging the cork oak tree. A 100% natural material, biodegradable, recyclable and renewable. Cork is a very light, soft, natural hypoallergenic raw material.

Nature's thermal, acoustic and vibration insulator. So perfect that no industrial process has yet been able to replicate its features.

Lambda's classic golf shoes are ethically manufactured with premium environment-friendly quality materials and the latest innovative technology, remaining functional, reliable, comfortable and fashionable.

We manufacture all Lambda shoes ourselves in Portugal, Europe, ensuring the highest quality from start to finish, using only locally sourced materials.

FEATURES

We use only prime european leathers, softened for superior comfort.

The outer leather undergoes a water repellent tanning treatment process, becoming our golf shoes first waterproof barrier. All our shoes have a waterproof breathable membrane with one year waterproof normal use guarantee.

We guarantee a no break-in period, our golf shoes can be worn painlessly right out of the box.
